• Il concetto "capacità" deve essere condiviso e,
per attuare la "Programmazione dell'azione educativa", definito per elencazione:
Analizzare .. Applicare .. Argomentare ..
Comunicare .. Comprendere .. Decidere .. Scegliere .. Giustificare ..Generalizzare .. Interpretare .. Memorizzare .. Modellare ..
Progettare .. Relativizzare .. Riconoscere .. Ristrutturare .. Sintetizzare .. Sistematizzare .. Trasferire .. Valutare ..

Non
è fuori luogo la comparazione di questo modello scolastico con "La buona scuola" che
• Prevede insegnamenti autonomi di cui
non sfrutta le sinergie. Il paragrafo 6 della legge 107 elenca gli "Obiettivi formativi ritenuti prioritari", più del 50% è sbagliato perché
non attiene alla finalità del sistema scolastico.
• Presuppone che l'insegnamento universitario sia il riferimento;
• Cancella la
progettualità. La legge 107 richiama l'estinto art 21 della legge 15 marzo 1997, n. 59 per bypassare il Dpr del 99 sull'autonomia la cui
"sostanza è la progettazione e la realizzazione d'interventi di educazione, formazione e istruzione mirati allo sviluppo della persona
umana";
• Reintroduce l'obsoleto modello organizzativo gerarchico lineare: al dirigente scolastico sono attribuite tutte le
responsabilità del servizio;
• Titola: Sistema nazionale di istruzione e formazione cestinando la finalità educativa, presente nella
precedente denominazione. Per "La buona scuola" le capacità sono insignificanti.
